The 2019 Cataract Surgical Equipment Market Report provides new analysis of future potentially disruptive cataract surgery techniques, costs of surgery by technology, and the uncertain future of FLACS lasers and what we see happening. The report also explores the implications of a dominant competitor scenario, in which one company accounts for half of total sales today.

The 2019 Cataract Surgical Equipment Market Report provides in-depth coverage of the equipment and devices used in cataract and other IOL procedures, providing data and forecasts on cataracts and cataract surgeries worldwide. The report includes analysis of current markets, identification of important trends, and key factors for future success. The following information is also included:

- Data on cataract incidence and cataract surgeries worldwide;
- Current estimates and five-year forecasts for global cataract surgery volume;
- Discussion of presbyopia, refractive errors, and refractive lens exchange procedures;
- Profiles of the cataract and cataract/refractive surgeon in the US;
- Information about corporate surgery providers;
- Examination of current reimbursement levels;
- Descriptions and discussion of phaco machines and femtosecond laser-assisted cataract surgery equipment;
- Analysis of cataract surgical device manufacturers and market share;
- Examination of markets for phaco packs and accessories;
- Information on the market for photodisruptor lasers.
Market Scope has prepared this report for companies participating in the cataract equipment industry—cataract surgeons, cataract/refractive surgeons, market analysts, industry investors, and anyone else with an interest in the business of cataract surgery, refractive lens exchange, or related products. The report offers a comprehensive analysis of the 2019 global market in cataract surgical equipment, as well as a discussion of important trends and key factors for future success. The report looks at the market’s evolution and forecasts growth over the next five years.
