2020 KNEE ARTHROPLASTY MARKET REPORT

AUTHOR
David Harmon, MS

PUBLISHED
March 2020

This report identifies important trends and provides estimates of revenue and unit sales for the knee arthroplasty market. Our analysis focuses on 2020 and forecasts growth through 2025.

Knee arthroplasty is a major source of revenue for the orthopedic market. Global demand for knee procedures is rising alongside expanding elderly populations and increased access to care in historically underserved countries. New technology and innovative implant designs promise to shift the cost-benefit ratio of the procedures, which coincides with pressure from global health care system to decrease costs. However, the COVID-19 pandemic will greatly impact the market landscape in 2020.

This report provides an in-depth analysis of the global knee arthroplasty market with forecasts through 2025. It is designed for manufacturers, providers, market analysts, and investors who are interested in the market and related products.
