PUBLISHED
September 2021

The new “2021 Single-Use Ophthalmic Surgical Products Market Report” addresses the decline in cataract, refractive, retinal, glaucoma, oculoplastic, and general surgery in 2020 by major country. It also projects the backlog of unoperated eyes needing ophthalmic surgery through 2026.

Market Scope

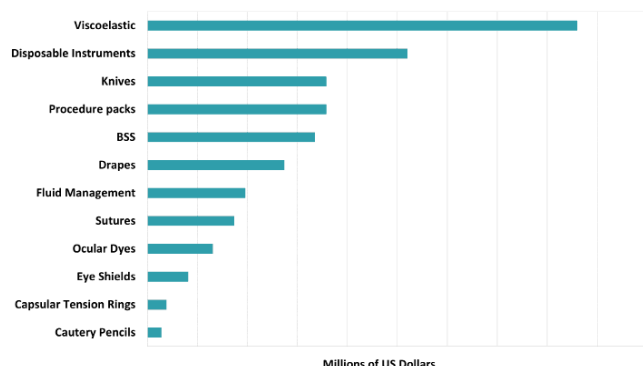

2021 Single-Use Ophthalmic Surgical Products Market Report

The “2021 Single-Use Ophthalmic Surgical Products Market Report” offers a comprehensive analysis of the global market for single-use ophthalmic surgical products and forecasts market performance over the next five years. Important trends and key factors for future success are also discussed. The following information is included:

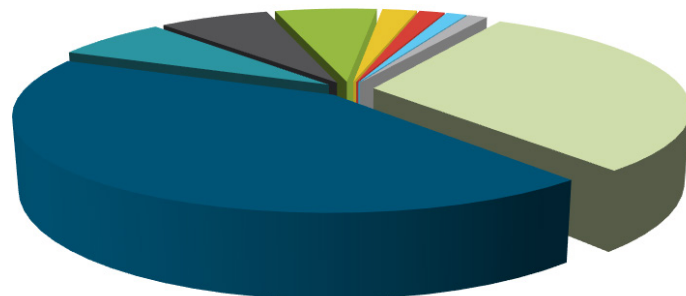

- Five-year forecast for the number of cataract, refractive, retinal, glaucoma, oculoplastic, and other ophthalmic surgeries by country/region and resulting single-use product sales by surgical subspecialty.
- Market segments profiled include viscoelastics, knives, disposable instruments, balanced salt solutions, procedure packs, drapes, sutures, fluid management devices, eye shields, ocular dyes, capsular tension rings, and cautery pencils.
- A listing of the factors that will shape the single-use products market through 2026.
- Chapters for each of the 12 product categories, including product sales drivers, sales by surgical subspecialty, and key competitors’ market shares
- Information on ophthalmic surgery providers.
- Profiles of companies in the single-use ophthalmic surgery products industry.

Each market segment includes an analysis of competitors and five-year forecasts for market performance. The report also includes an overview of ophthalmic surgeries, surgical providers in the US and worldwide, and 43 competitor profiles.

Global Single-Use Surgical Products Market by Product Category

Leaders in the 2021 Single-Use Ophthalmic Device Market by Market Share

The report discusses how large market participants are increasing their market dominance, examines the importance of cross-merchandising strategies used to sell multiple single-use surgical product lines, and analyzes the increasing demand for disposable products due to concerns over COVID-19 as a way to prevent cross-contamination. The report also looks at consolidation in the market segments of OVDs, instruments, and surgical packs globally and evaluates the countervailing forces that will drive and slow the use of disposable surgical devices.
