AUTHOR
William Freeman

PUBLISHED
October 2021

This third edition of Market Scope's "Premium Cataract Surgery Market Report" examines and measures the impact of COVID-19 on cataract surgery in 2020 and 2021 by country and predicts the size of the patient backlog and how long it might take to catch up. The report describes how new technology, such as the first combined phaco/FLACS laser, is driving increased premium cataract surgery (PCS) penetration.

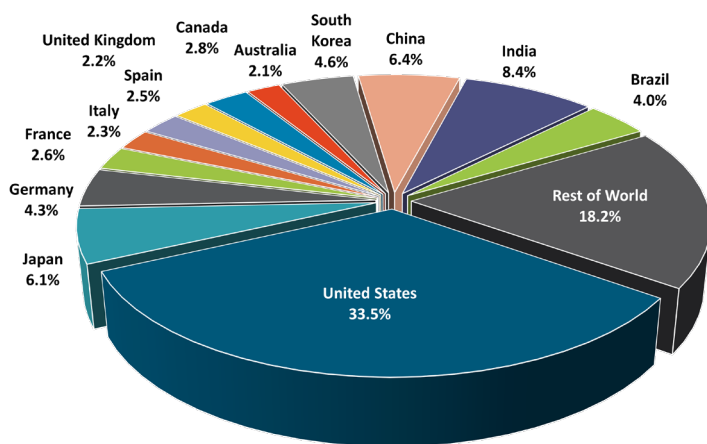

Market Scope

2021 Premium Cataract Surgery Market Report

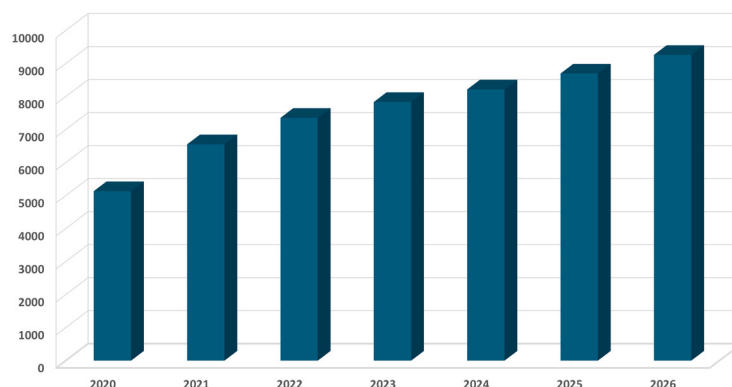

The "2021 Premium Cataract Surgery Market Report" offers an in-depth examination of the current premium cataract surgery (PCS) market and forecasts performance through 2026. It includes analysis of the global PCS procedure and product revenue, identification of important trends, and discussion of key factors for future success. The following information is also included:

- Presbyopia-correcting, toric, and post-op adjustable IOLs, FLACS lasers, FLACS arcuate incisions, manual limbal relaxing incisions, and excimer IOL enhancements.
- In-depth profiles of the top 13 PCS markets: US, Japan, Germany, France, Italy, Spain, the UK, Canada, Australia, South Korea, China, India, and Brazil
- Snapshots of each of the world's top 13 PCS countries, listed above.
- Individual country executive summary.
- Analysis of the cost of public and private cataract surgery options by country.
- Forecasts for PCS procedures and manufacturer revenue by country.
- Forecasts for provider revenue resulting from PCS procedures by country.
- Percentage of PCS procedures performed in each key country by cataract-only, cataract/refractive, and refractive-only surgeons.

PCS Market by Country

Global PCS Procedures Projection

The new report analyzes how aging and increasingly wealthy populations are leading to expected increased penetration and predicts net wealth by age group for each of the top 13 countries. It also includes landscape narratives on six additional countries that are important in the PCS market.
