PUBLISHED
November 2021

The “2021 Cornea Products Market Report” features new forecasts for populations that could benefit from a cornea transplant, analyzing those with access to care and splitting forecasts by region and by surgical technique. The report also includes new insights on total cornea treatments, revised five-year forecasts for cornea transplants, and updated estimates for population with cornea disease in six categories and 51 diseases.

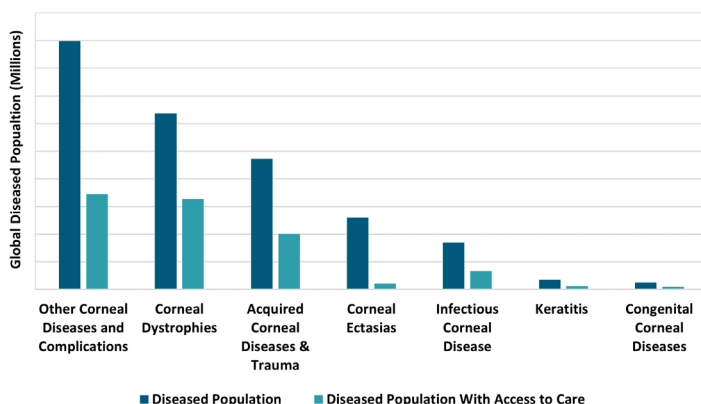

Market Scope

2021 Cornea Products Market Report

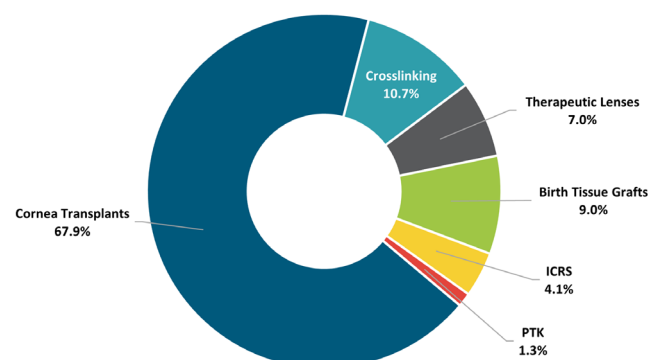

The “2021 Cornea Products Market Report” provides an overview of corneal diseases and provides estimates for the populations in six disease categories. The report discusses cornea products and treatments and revenue forecasts for cornea transplants, therapeutic lenses, PTK, intrastromal corneal ring segments, and corneal crosslinking. It also discusses organ donation policy, regulations, and the role of cornea specialists, eye banks, and other organizations. The following information is included:

- Information on corneal diseases
- Current and five-year estimates for the population with corneal diseases: ectasias, corneal dystrophies, congenital corneal disease, acquired corneal diseases and trauma, infectious corneal diseases, keratitis, and other corneal syndromes and complications
- Discussion on the global regulatory and organ transplantation environment
- Information on ophthalmologists, cornea specialists, and cornea transplant surgeons
- Forecasts by region for: phototherapeutic keratectomy procedures, therapeutic lenses, and intrastromal corneal ring segments, corneal crosslinking
- Forecasts for cornea transplants by region, surgical technique, indication
- Discussion of new products in development
- Discussion of key products and companies

**Global Population
with Corneal Diseases**

**Global Cornea Revenue
Share by Category**

This report is designed for ophthalmic industry manufacturers, providers, market analysts, and investors interested in the corneal treatment market or related products. The information covers corneal diseases and diseased populations, the cornea transplant landscape, surgical corneal treatments, and forecasts for therapeutic lenses, intrastromal corneal ring segments, birth tissue grafts, and corneal crosslinking — but it excludes surgical instruments used in cornea surgeries (which are included in other Market Scope reports).
