AUTHOR
William Freeman

PUBLISHED
February 2022

The new “2022 Retinal Surgical Device Market Report” provides new sales distribution analysis showing each manufacturer’s distribution by country/region; calculates vitrectomy pack reuse in developing countries, which has led to an increase in the estimated number of vitrectomies in those countries; and evaluates the future of robotic vitrectomy based on the latest KOL conversations at the 2021 ESCRS and AAO meetings.

The report calculates the vitrectomy backlog created in 2020 and 2021 and projects strong future vitrectomy growth. We have resized the vitrectomy machine and dedicated pack market based on feedback from the leading vitrectomy equipment manufacturers.

Market Scope

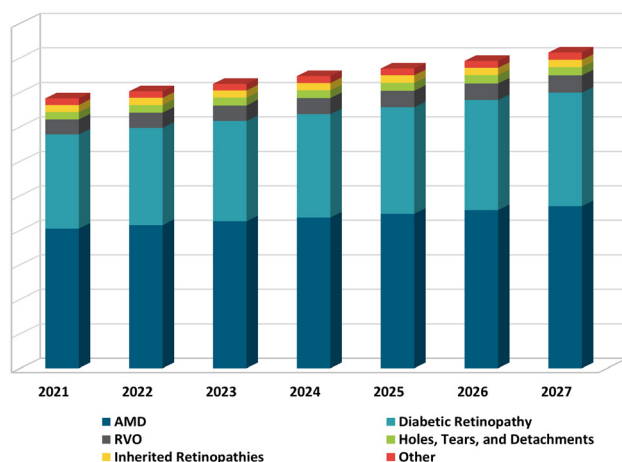

2022 Retinal Surgical Device Market Report

The “2022 Retinal Surgical Device Market Report” provides in-depth analysis of the global retinal device market, examining the market’s size and growth, as well as identifying important developments that may shape its future. The analysis focuses on the 2022 market and forecasts market growth and evolution through 2027.

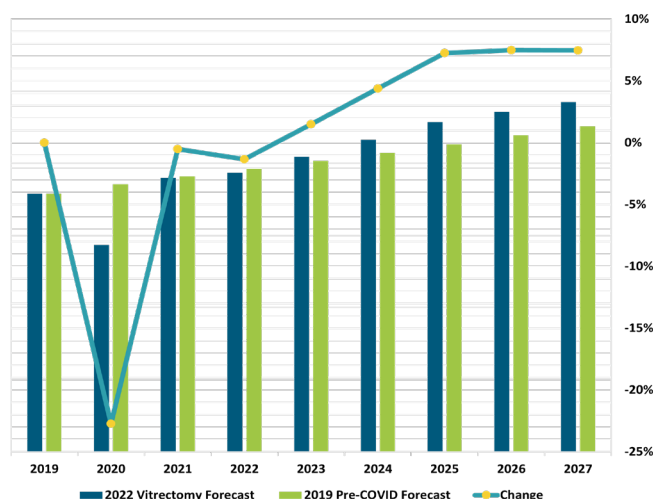

It covers currently commercialized devices, as well as device technologies in development, and provides forecasts for future market activity. Topics include retina physiology, the epidemiology of retinal disease, patient economics and reimbursements, and retina specialists who provide care. Additionally, 35 retina device companies are profiled, with discussion of their products, strategic market position, background, and outlook. Coverage also includes:

- Prevalence data
- Vitrectomy machines and machine packs
- Hemostatic devices
- Retinal surgical instruments
- Non-invasive procedures (laser and radiation)
- Implantable telescopic IOLs
- Artificial vision technologies
- 35 company profiles

Global Retinal Disease Population by Type

Pre-COVID vs. 2022 Global Vitrectomy Forecast

Market Scope's "2022 Retinal Surgical Device Market Report" is designed for retinal surgical device developers and manufacturers, retina specialists, other retinal care providers, market analysts, and investors interested in the retinal surgical device business or related products. The report covers currently commercialized devices, as well as device technologies in development, and it provides forecasts for future market activity.
