September 2018

Single-use surgical device revenues in 2018 will exceed \$3.2 billion globally, making it the second largest ophthalmic surgical device category behind IOLs.

Cataract surgery accounts for nearly three-quarters of total revenues. The segment is driven by steady increases in surgical volume, with nearly 27 million cataract procedures expected worldwide in 2018. We analyze the single-use device market by several filters, including product category, surgical subspecialty, competitor, and geographic or economic region. We look for the single-use device market to grow to \$4 billion by 2023.

Our report on the global single-use ophthalmic surgical products market, now in its eighteenth edition, is a leading industry source for accurate and relevant information on all aspects of the ophthalmic single-use device market. We review cataract surgery, the dominant procedure in this market, as well as cataract surgery providers worldwide. We analyze the following market segments: viscoelastics, knives, disposable instruments, balanced salt solutions, custom-packs, drapes, sutures, fluid management devices, ocular sealants, ocular dyes, capsular tension rings, and cautery pencils.

Market Scope

2018 Single-Use Ophthalmic Surgical Products Report

Market Scope's 2018 Single-Use Ophthalmic Surgical Products Report provides in-depth coverage of single-use devices used in cataract surgery and other ophthalmic procedures.

Twelve categories are analyzed in this report:

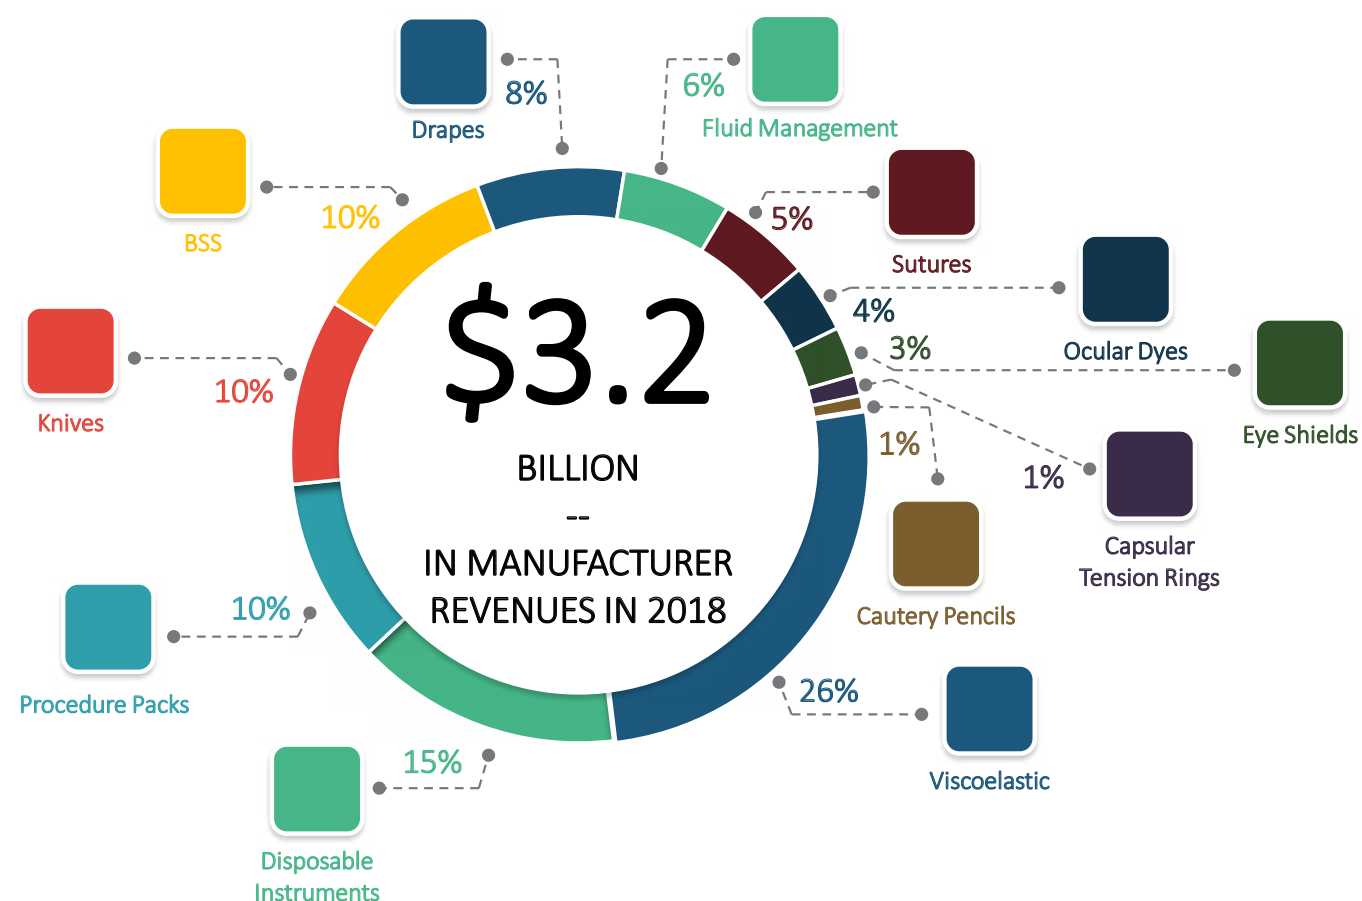

Viscoelastic, knives, disposable instruments, BSS, procedure packs, drapes, sutures, fluid management devices, ocular dyes, eye shields, capsular tension rings, and cautery pencils.

Each market segment includes:

An analysis of market competitors and five-year forecasts for market performance.

Also included in this report:

- Overview of ophthalmic surgeries
- Surgical providers in the US and worldwide
- 45 company profiles plus additional company listings
- 79 color tables and 74 color figures

> This report includes market data for 2017, and we forecast market performance through 2023.

Our Process

Market Scope's industry reports are meticulously prepared by a dedicated team of in-house consultants/analysts with over 100 years of collective ophthalmic experience and each data point is driven by a combination of sources, including the following:

- Our proprietary global disease population and demographic models;
- Twenty years and counting of ophthalmologist survey data;
- Analysis of company published financial reports;
- Focused coverage of ophthalmic scientific research, business news, and other activities;
- Attendance and participation in major, worldwide ophthalmic meetings;
- Interviews and long-standing relationships with company executives and practicing ophthalmologists.
