AUTHOR
William Freeman

PUBLISHED
March 2023

The new “2023 Retinal Surgical Device Market Report” focuses on the latest developments in robotic vitrectomy, examines when the technology will most likely become available, and shows which elements of robotic vitrectomy are most likely to be adopted by retina surgeons, by priority. The report summarizes the most likely vitrectomy machine developments that will enable widespread adoption of ophthalmic gene therapy in the future, examines the pros and cons of intraoperative OCT and evaluates its future integration with vitrectomy machines, and looks at 3D visualization systems increasingly being offered by the leading vitrectomy machine providers.

Market Scope

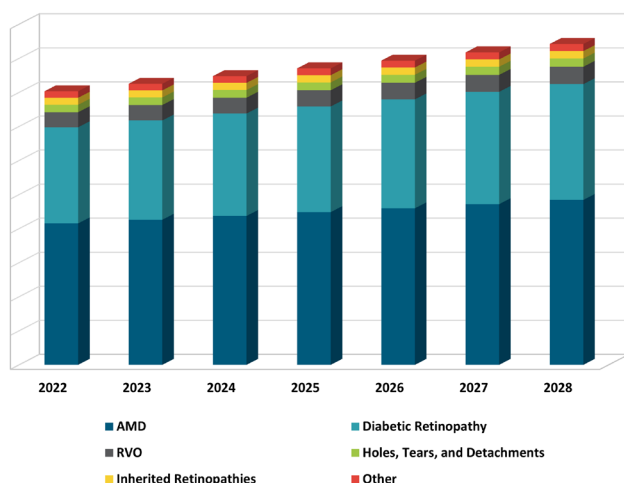

2023 Retinal Surgical Device Market Report

The “2023 Retinal Surgical Device Market Report” provides in-depth analysis of the global retinal device market, examining the market’s size and growth, as well as identifying important developments that may shape its future. The analysis focuses on the 2023 market and forecasts market growth and evolution through 2028.

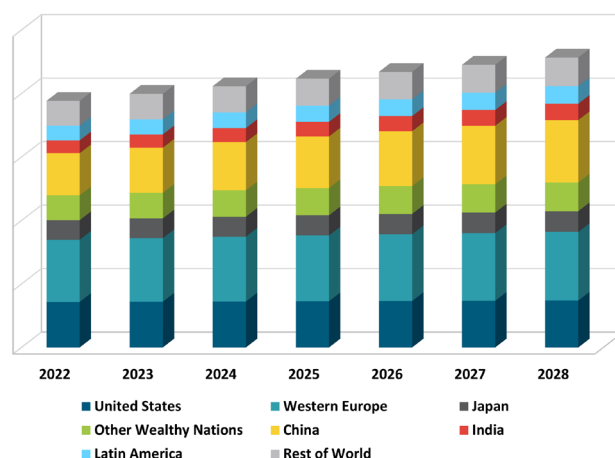

It covers currently commercialized devices, as well as device technologies in development, and provides forecasts for future market activity. Topics include retina physiology, the epidemiology of retinal disease, patient economics and reimbursements, and retina specialists who provide care. Additionally, 34 retina device companies are profiled, with discussion of their products, strategic market position, background, and outlook. Coverage also includes:

- Prevalence data
- Vitrectomy machines and machine packs
- Hemostatic devices
- Retinal surgical instruments
- Non-invasive procedures (laser and radiation)
- Implantable telescopic IOLs
- Artificial vision technologies
- 34 company profiles

Global Retinal Disease Population by Type

Vitrectomy Surgery Forecast by Region

Market Scope's "2023 Retinal Surgical Device Market Report" is designed for retinal surgical device developers and manufacturers, retina specialists, other retinal care providers, market analysts, and investors interested in the retinal surgical device business or related products. The report covers currently commercialized devices, as well as device technologies in development, and it provides forecasts for future market activity.

Our Process

Market Scope's industry reports are meticulously prepared by a dedicated team of in-house analysts with over 100 years of collective ophthalmic market research experience. Each data point is driven by a combination of sources, including:

- Our proprietary global disease population and demographic models
- Analysis of company-published financial reports
- Focused coverage of ophthalmic scientific research, business news, and other activities
- Attendance and participation in worldwide ophthalmic meetings
- Interviews and relationships with company executives and practicing physicians
