December 2025

The “2025 Cornea Products Market Report” features a new section on the global market opportunity for Fuchs’ dystrophy treatment, examining the potential market impact of alternate Fuchs’ dystrophy treatment opportunity by region and presenting key metrics for the top 10 potential markets.

The report also includes updated estimates for population with corneal disease for six categories and 52 diseases and a revised forecast for the total population that could benefit from a cornea transplant, with breakouts for those with access to ophthalmic care and those who could benefit from upcoming therapies.

Market Scope

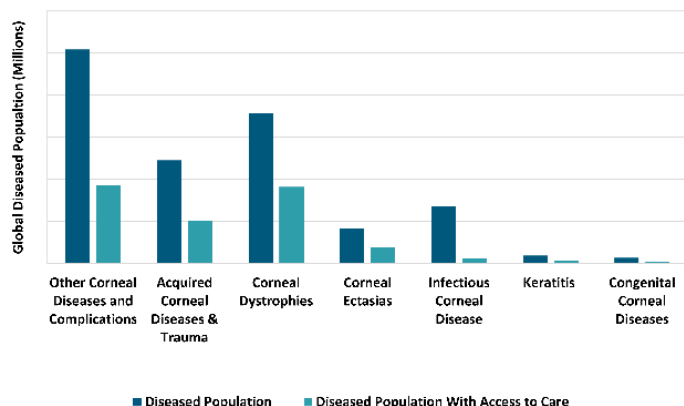

2025 Cornea Products Market Report

The “2025 Cornea Products Market Report” delivers an in-depth analysis of the global cornea market, highlighting the latest advances in transplantation, crosslinking, and therapeutic devices aimed at restoring and preserving vision. The report estimates disease prevalence across six major corneal conditions and examines evolving treatment approaches, including cornea transplants, therapeutic lenses, phototherapeutic keratectomy (PTK), intrastromal ring segments, and corneal crosslinking.

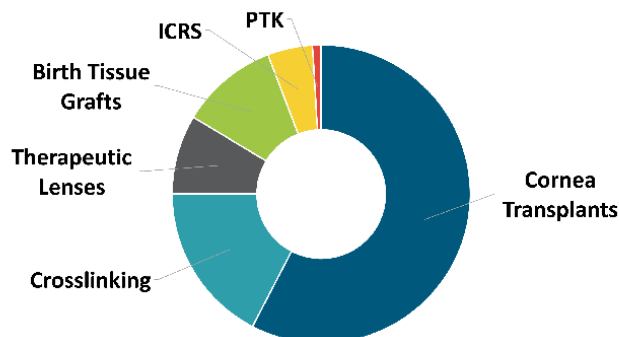

It also explores the global ecosystem that supports cornea care—spanning organ donation systems, regulatory environments, and the pivotal roles of cornea specialists, eye banks, and nonprofit organizations. The following information is included:

- **Estimates and five-year forecasts for populations affected by major corneal diseases**, including ectasias, dystrophies, congenital and acquired disorders, trauma, infections, keratitis, and neurotrophic keratitis.
- **Analysis of the global organ donation and regulatory environment**, and the roles of cornea specialists, surgeons, and eye banks.
- **Regional forecasts for phototherapeutic keratectomy (PTK), therapeutic lenses, intrastromal corneal ring segments, corneal crosslinking, and cornea transplants**—by region, surgical technique, and indication.
- **Evaluation of key commercial products, emerging pipeline technologies, and competitive positioning of leading market players.**

Global Population with Corneal Diseases

Global Cornea Revenue Share by Category

This report is designed for ophthalmic industry manufacturers, providers, market analysts, and investors interested in the corneal treatment market or related products. The information covers corneal diseases and diseased populations, the cornea transplant landscape, surgical corneal treatments, and forecasts for therapeutic lenses, intrastromal corneal ring segments, birth tissue grafts, and corneal crosslinking — but it excludes surgical instruments used in cornea surgeries (which are included in other Market Scope reports).
