# What's New

AUTHOR  
Kristen Harmon Ingenito

RELEASED  
December 2018

New in the 22nd edition of the Refractive Surgery Report:

- Revised inlay estimates after closure of ReVision;
- Better insight into presbyopia procedure estimates by treatment modality;
- Revised RLE estimates, especially in their wealthy nations and western Europe;
- Addition of presbyopia topical treatments;
- Updated patient insights.

## Market Scope

# 2018 Refractive Surgery Report

Market Scope's 2018 Refractive Surgery Report provides in-depth coverage of the retail and manufacturer-level market for refractive and presbyopia-correcting surgery and the surgical technologies employed by surgeons offering these procedures.

**Our report is organized into key areas and includes:**

Refractive disorders and population, treatment of refractive errors, and surgical vision correction.

**Market segments included in this report:**

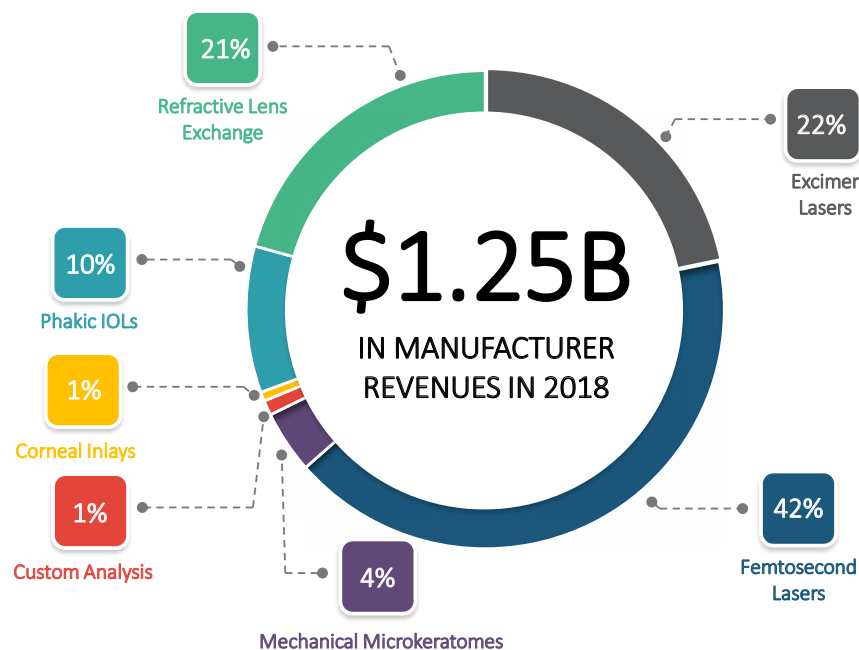

Presbyopia-correcting market, mechanical microkeratomes market, femtosecond lasers market, and excimer lasers market.

**Each market segment includes:**

An analysis of market competitors and five-year forecasts for market performance.

**Also included in this report:**

- 276 comprehensive pages;
- 8 geographic and economic breakouts;
- 22 company profiles;
- 68 color tables and 66 color figures.

In this report, we cover the global refractive and presbyopia-correcting surgical markets and forecast performance over the next five years. We examine the prevalence of myopia, hyperopia, astigmatism, and presbyopia and the relationships among these refractive disorders. We discuss the impact of economic conditions on demand for an elective procedure. We also examine the companies involved in the manufacturing and marketing of refractive and presbyopia-correcting surgical products and procedures.

> This report includes market data for 2017, and we forecast market performance through 2023.

## Our Process

Market Scope's industry reports are meticulously prepared by a dedicated team of in-house analysts with over 100 years of collective ophthalmic experience and each data point is driven by a combination of sources, including the following:

- Our proprietary global disease population and demographic models;
- Twenty years and counting of ophthalmologist survey data;
- Analysis of company published financial reports;
- Focused coverage of ophthalmic scientific research, business news, and other activities;
- Attendance and participation in major, worldwide ophthalmic meetings;
- Interviews and long-standing relationships with company executives and practicing ophthalmologists.
